

Arcforce Cross slides are high precision cross slides designed for easy/fine torch holder adjustment by hand.

Allows accurate torch positioning with comfort and ease.

The two plane adjustment is smooth and controlled to give precise torch positioning.

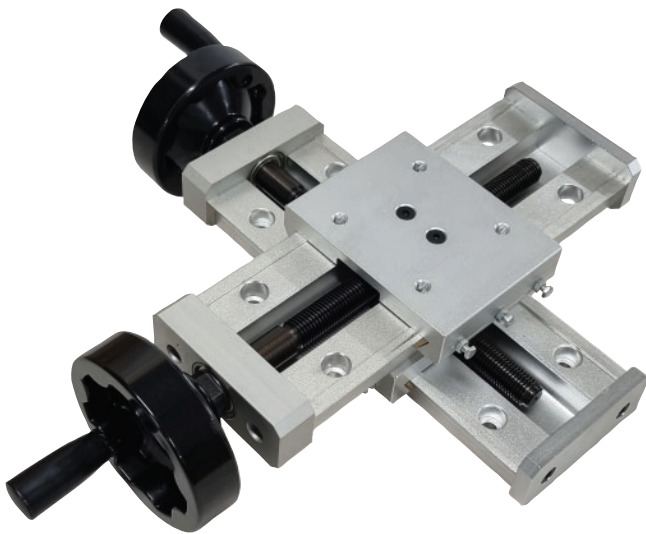

All Arcforce cross slides are load rated to enable correct selection in both capacity and length of adjustment.

Additional sizes and capacities are available upon request.

Please contact IWWS for further options.

Electric cross slides are also available upon request.

Electric cross slides are currently order in only.

AFCS1500
